AUTHOR INDEX

Abbreviations: (BR), Book Review; (CC), Computer Corner; (L), Letter to the Editor; (PSM), Protein Sequence Motif; (R), Reflections

A

Abe, I., see Poralla, K. (PSM) 157
Aggeler, R., see Capaldi, R.A. 284
Agre, P., see Chrispeels, M.J. 421
Alex, L.A., see Swanson, R.V. 485
Allen, B.G. and Walsh, M.P., The biochemical basis of the regulation of smooth-muscle contraction 362
Andreola, M., see Litvak, S. 114
Appel, R.D., Bairoch, A. and Hochstrasser, D.F., A new generation of information retrieval tools for biologists: the example of the ExPASy WWW server (CC) 258
Ashall, F. and Goate, A.M., Role of the β-amyloid precursor protein in Alzheimer's disease 42
Avruch, J., Zhang, X-f. and Kyriakis, J.M., Raf meets Ras: completing the framework of a signal transduction pathway 279

B

Bacskai, B.J., Biotechnology Applications of Microinjection, Microscopic Imaging, and Fluorescence (BR) 306
Bairoch, A., see Appel, R.D. (CC) 258
Baltimore, D., see Feller, S.M. 453
Bamber, G.W., see Radzio-Andzelm, E., (Poster) TIBSC 01
Barber, J., The Photosynthetic Reaction Center (Volumes 1 and 2) (BR) 558
Barclay, A.N., see van der Merwe, P.A. 354
Barnes, W.M., Reply – Tips and tricks for long and accurate PCR (CC) 342
Barton, G., **scop**: structural classification of proteins (CC) 554
Baumeister, W., see Lupas, A. (PSM) 533
Beaud, G., Control of Messenger RNA Stability (BR) 261
Been, M.D., *Cis*- and *trans*-acting ribozymes from a human pathogen, hepatitis delta virus 251
Bell, C., DNA Workbench (CC) 427
Benkovic, S., see Posner, B. 145
Benz, J., see Demange, P. 272
Berendes, R., see Demange, P. 272
Bergeron, J.J.M., Brenner, M.B., Thomas, D.Y. and Williams, D.B., Calnexin: a membrane-bound chaperone of the endoplasmic reticulum 124
Bhattacharya, S., Navaratnam, N., Morrison, J.R., Scott, J. and Taylor, W.R., Cytosine nucleoside/nucleotide deaminases and apolipoprotein B mRNA editing 105
Birney, E., see Gibson, T.J. 349
Blamire, A.M., see Shulman, R.G. 522
Blobel, G., see Moore, M.S. 211
Blumer, K.J. and Johnson, G.L., Diversity in function and regulation of MAP kinase pathways 236
Boddy, M.N., Freemont, P.S. and Borden, K.L.B., The p53-associated protein MDM2 contains a newly characterized zinc-binding domain called the RING finger (PSM) 198
Boguski, M. and McEntyre, J., I think therefore I publish (L) 71
Borden, K.L.B., see Boddy, M.N. (PSM) 198
Bork, P. and Sudol, M., The WW domain: a signalling site in dystrophin? (PSM) 531
Bork, P., see Koonin, E.V. (L) 234
Bork, P., see Ouzounis, C. (PSM) 199
Borodovsky, M., Koonin, E.V. and Rudd, K.E., New genes in old sequence: a strategy for finding genes in the bacterial genome 309
Bossemeyer, D., The glycine-rich sequence of protein kinases: a multifunctional element 201
Brenner, M.B., see Bergeron, J.J.M. 124
Brierley, I., Principles of Molecular Virology (BR) 433
Brocklehurst, S.M., Kalia, Y.N. and Perham, R.N., Protein–protein recognition mediated by a mini-protein domain: possible evolutionary significance (PSM) 360
Brocklehurst, S.M., The Adhesion Molecule FactsBook (BR) 390
Brugge, J.S., see Clark, E.A. 464
Buchner, J., see Jakob, U. 205
Buchner, J., The Biology of Heat Shock Proteins and Molecular Chaperones (BR) 559
Burger, A., see Demange, P. 272

SUBJECT INDEX

Compiled by Mary Purton
Abbreviations: CC, Computer Corner; L, Letter to the Editor; PSM, Protein Sequence Motif

A
Abl
  nuclear protein tyrosine kinases 373
  SH2 and SH3 domains 455
acetyl-CoA carboxylase (L) 359
acetylcholine receptor, allosteric transitions 366, 399
actin, interactions with nebulin 408
activins, transforming growth factor β receptor 548
actomyosin complex 131
AdoMetDC, translational control 161
agarose gels
  blue fluorescence (CC) 556
  DNA recovery (CC) 388
  slants and spots (CC) 300
allostery, acetylcholine receptor 396, 399
Alzheimer's disease 42
L-amino acid decarboxylases (PSM) 318
aminoacyl–tRNA 188
β-amyloid precursor protein 42
annexins
  and endocytosis 231
  structure and function 272
antibodies
  antibody mimics and molecular imprinting 10
  catalytic 145
  and oligonucleotide selection 62
antisense RNA, control of plasmid replication 294
α_1-antitrypsin, and calnexin 128
APC tumour suppressor, and β-catenin 538
apoptosis 26, 99
aquaporins 421
ArcB, two-component signalling systems 487
armadillo protein 538
aromatic L-amino acid decarboxylase (PSM) 318
aspartate phosphorylation 485
ATP hydrolysis
  F_1F_o-type ATPases 284
  RecA-mediated 217
autonomously replicating sequences (ARSs), eukaryotic replication origins 320

B
Bcl-2, role in apoptosis 29, 99
betaglycan, transforming growth factor β receptor family 548
biochemistry, general 395
bioremediation 3
biosensors, molecular 13
pBluescript vector contamination (CC) 139
bond stability 526
bone morphogenetic proteins, transforming growth factor β receptor family 548
brain function, NMR studies 522

C
cadherins
  and β-catenin 538
  transient intercellular adhesion 354
CAK see $p34^{cdc2}$-activating kinase
calcium
  regulation of smooth-muscle contraction 362
  role in apoptosis 26
calcium-binding site, in annexin V 272
calmodulin
  role in apoptosis 28
  smooth-muscle contraction 362
calmodulin-dependent protein kinase II (CaMK II)
  intracellular translocation 450
  specificity determinants 440
calnexin 124
calponin, role in smooth-muscle contraction 366
calreticulin 269
calyculin A 444
cantharidin 444
carnitine palmitoyltransferase (CPT I), hepatic fatty acid metabolism 314
Cas, and SH2 domains 457
casein kinase I-like kinases, in DNA repair 501
catalase, RNA-binding activity 101
catalytic antibodies, combinatorial libraries 145
β-catenin and cell adhesion 538
cauliflower mosaic virus 35 S RNA, translational control 160
CCT, a cytosolic chaperonin 543
CD45, coordination with protein tyrosine kinases 481
cdc2
  feedback control 483
  spatiotemporal distribution 448
cdc25
  feedback control 483
  spatiotemporal distribution 449
CED-3 and apoptosis 99
cell adhesion
  carbohydrate-mediated interactions 223
  and β-catenin 538
  transient intercellular adhesion 354
cell-adhesion molecules, weak protein–protein interactions 354
cell cycle
  eukaryotic replication origins 320
  $p34^{cdc2}$-activating kinase (CAK) 496
  protein kinases and DNA damage 500
  spatiotemporal distribution of protein kinases and phosphatases 448
cell-cycle arrest, transforming growth factor β receptor 548
cell-cycle control
  CDK inhibitors 143
  and transcription 108
cell-cycle regulation, of nuclear tyrosine kinases 373
channel-forming integral protein (CHIP) 421
chaperonins
  CCT 543
  see also Hsp60 family
chemotaxis proteins 486
chiral separation, by molecularly imprinted polymers 10
chk1, in DNA repair 503
chloroplast NADH–plastoquinone oxidoreductase (PSM) 401
chromatin structure, and transcription 41, 240
CIP2/CDI1 CDK inhibitor 143
citric acid cycle, metabolic regulation 519
coated-vesicle budding, role of annexins 231
Cockayne's syndrome, DNA repair 83
coiled coils 51
combinatorial libraries
  catalytic antibodies 145
  shape 57
connectin *see* titin
contractile cycle 131
convergent evolution 15
CopA and CopT RNA, control of plasmid replication 294
corkscrew, signal transduction in the early *Drosophila* embryo 511
CPA1, translational control 161
Crk, SH3 domains 454
cryoelectronmicroscopy, F_1F_o-type ATPases 284
α-crystallin, homology to small Hsps 209
cyclic AMP-dependent protein kinase (PKA)
  activation of the CFTR Cl^- channel 513
  glycine-rich sequence 203
  specificity determinants 440

cyclic AMP response element binding protein, phosphorylation by transforming growth factor β receptor 548
cyclin-dependent kinase inhibitors 143
cyclin-dependent protein kinases
glycine-rich sequence 203
and RB 110
spatiotemporal distribution 448
and transforming growth factor β receptor 552
see also cell cycle
cyclins
cyclin H 496
and DRTF1/E2F 110
spatiotemporal distribution 448
and transforming growth factor β receptor 552
see also cell cycle
cyclosporin A, and phosphatase inhibition 444
cystic fibrosis transmembrane conductance regulator (CFTR)
and calnexin 128
Cl^- channel 513
cytochrome *c* oxidase, RNA-binding activity 101
cytochrome oxidase superfamily, structure and function 325
cytokine receptor superfamily, JAKs and STATs 222
cytosine nucleoside/nucleotide deaminases (PSM) 105
cytoskeleton
and catenins 538
PH domains 351
protein tyrosine phosphatases 154

D
deadenylation, and mRNA degradation 336
development
β-catenin and cell adhesion 538
signal transduction in the early *Drosophila* embryo 509
1,2-dichloroethane, dehalogenation 3
dihydrofolate reductase, RNA-binding activity 101
dihydrolipoyl acyltransferase (PSM) 360
dihydrolipoyl dehydrogenase (PSM) 360
divergent evolution 15
DNA
concentration determination (CC) 93
hybridization 343
recovery, from agarose gels (CC) 388
renaturation 343
restriction digests, microwaving (CC) 556
sequence analysis methods 429
strand separation 343
transposition, role of phosphoryl transfer 79
DNA-binding proteins, WrbA family (PSM) 72, 107, 234, 235
DNA chaperones, nucleoprotein-complex formation 185
DNA repair
nucleotide excision 83
poly(ADP)-ribosylation 172 (erratum 250)
and protein kinases 500
role of RecA 217
role of TFIIH 504
DNA replication
origins, eukaryotic 320
plasmid 294
DNA Workbench (CC) 416
DnaJ 22
DnaJ-like proteins 176
J-domain in viral T antigen (L) 277
DnaK 22
DP-1, in E2F DNA binding 112
DRA protein (PSM) 19
Drk, signal transduction in the early *Drosophila* embryo 511
Drosophila
signal transduction in the early embryo 509
transcriptional repression 40
DRTF1/E2F 108
drug discovery, using combinatorial shape libraries 64
DsbA protein family, and bacterial protein disulphide isomerase 169, 332
dystrophin (PSM) 531

E
E1a and DRTF1/E2F 108
E2F/DRTF1 108
E4 ORF 6/7 protein, and DRTF1/E2F 108
elongation factor Tu (EF-Tu)
role in elongation cycle 188
structure and mechanism of activation 245
EndNote Plus (CC) software review 301
endocytosis, role of annexins 231
endonucleases
intron (PSM) 402
role in apoptosis 27
endoplasmic reticulum
calnexin and protein sorting 124
and protein disulphide isomerase 333
translocation of calreticulin 269
endosome fusion, role of annexins 231
Entrez (CC) software review 94
Env proteins, HIV, glycosylation 65
enzyme mimics, molecular imprinting 12
epidermal growth factor receptor family, oligomerization 459
ERCC (excision repair cross-complementing) genes 83
and TFIIH 506
erythrocyte membranes, aquaporins 421
ethidium bromide disposal (CC) 257
eukaryotic initiation factor-2 (eIF-2) 409, 491
evolution, convergent vs. divergent 15
exocytosis
role of phosphoinositides 56
role of Rab proteins 164
exopolyphosphatase (PSM) 156
ExPASy server (CC) 258
extracellular matrix, interaction with calreticulin 269
extracellular-signal-regulated kinase (ERK), *see* MAPK

F
F_1F_o-type ATPases, structure and function 284
FAR1 CDK inhibitor 143
fatty acid metabolism, hepatic 313
Fer tyrosine kinase 373
Fgr tyrosine kinase 373
fibrinogen, platelet activation 467
fibroblast growth factor (FGF) receptors, oligomerization 459
FITSIM (CC) 181
FK506 444
FMN binding or DNA binding in WrbA family? (PSM) 234, 235
Flp, site-specific recombinase 79
focal adhesion kinase (FAK) 151
platelet activation 465
Fos 39
FUS3, MAPK homologue 236

G
G proteins
βγ-complexes and PH domains 54, 353
see also GTP-binding proteins
GCD, and regulation of translation 492
GCN4, translational control 160, 409, 492
GDP-dissociation inhibitor, and Rab proteins 167
gel electrophoresis, slants and spots (CC) 300
gene expression
and DNA replication 322
regulation by calreticulin 269
regulation by TFIIH activity 504
see also translation, protein synthesis
genistein 446
genome sequencing project, *Escherichia coli* 309
glucocorticoid receptor, transcription and positioned nucleosomes 241
glucokinase, pancreatic β-cell glucose sensors 535
glucose transport, brain 522
GLUT1, pancreatic β-cell glucose sensors 536
GLUT2, pancreatic β-cell glucose sensors 535
GLUT4
insulin-receptor substrate 1 signalling system 292
and Rab3d 165
glutamate dehydrogenase, RNA-binding activity 101
glutathione, and protein disulphide isomerase 333
glutathione reductase (PSM) 360
glycans, HIV envelope 65
glyceraldehyde-3-phosphate dehydrogenase, RNA-binding activity 101
glycine loops, structure in protein kinases 201
glycolysis, metabolic channeling 193, 519
glycosylation, N-linked, of HIV envelope proteins 65
Golgi, vesicular traffic 55, *see also* vesicular traffic
gp120 and gp160, glycosylation 65

Grb2
insulin-receptor substrate 1 signalling system 292
SH2 and SH3 domains 453
GroEL 23
identity with CCT 543
GroES 24
growth hormone receptor, oligomerization 459
GTP-binding proteins
Rab and regulated exocytosis 164
Ran and nucleocytoplasmic transport 211
see also G proteins
GTPase activating protein (GAP)
PH domains 351
Ras–MAPK cascade 279
guanine-nucleotide exchange factors (GEFs)
eIF-2B 409
PH domains 351
guanosine pentaphosphate phosphohydrolase (PSM) 156

H

H–N–H motif (PSM) 402
haloalkane dehalogenase 3
heat-shock factor, structure 52
hemagglutinin, structure 51
heme–copper oxidase superfamily, structure and function 325
heme-regulated inhibitor kinase (HRI), regulation of eIF-2 491
hepatitis delta virus, structure and replication 251
histidine decarboxylase (PSM) 318
histidine phosphorylation 485
histones, nucleosome positioning and transcription 240
HIV
function of envelope glycáns 65
role of transfer RNA in replication 114
HMG1 and 2 proteins, role in nucleoprotein-complex formation 185
HOG1 236, *see also* MAPKs
homeodomains, prospero (PSM) 70
Hsp60 family 20
Hsp70
ATP-binding domain (PSM) 156
Escherichia coli 311
Hsp70 family 20
interaction with Hsp90 208
mitochondrial protein import 369
regulation by DnaJ-like proteins 176
and regulation of translation 492
Hsp90 205
and regulation of translation 492
Hsps, small 205
HU protein, role in nucleoprotein-complex formation 185
huckbein, signal transduction in the early *Drosophila* embryo 509

I

ICE (interleukin 1β converting enzyme), and apoptosis 99
immunoglobulin superfamily proteins
transient intercellular adhesion 354
similarities with SRCR superfamily 5
initiation codons, upstream 159
INK4 CDK inhibitor 143
insulin
and insulin-receptor substrate 1 289
pancreatic β-cell glucose sensors 535
regulation of hepatic fatty acid metabolism 313
insulin-like growth factor-1, and insulin-receptor substrate 1 289
insulin-like growth factor-binding protein type 3, nuclear localization signal (PSM) 278
insulin-receptor substrate 1 289
Int (integrase protein of phage λ), role in DNA strand transfer 78
integrins
interaction with calreticulin 269
platelet activation 464
transient intercellular adhesion 354
interleukin 1β converting enzyme (ICE), and apoptosis 99
interleukin-4 receptor, and insulin-receptor substrate 1 289
intermediate filaments, phosphorylation 451
Internet resources
Entrez software review (CC) 94
ExPASy server (CC) 258
Kinemages (CC) 135
KINSIM (CC) 181
scop protein structure database (CC) 554
SWISS-PROT database (CC) 258
World-Wide Web (CC) 258
intrasteric regulation, of protein kinases 440
intron endonuclease motif (PSM) 402
ion channels
acetylcholine receptor 296, 384, 399
annexin V 272
CFTR 513
IP90, *see* calnexin
iron regulatory protein (IRP) 101
iron responsive elements (IRE) 101
isocitrate dehydrogenase, RNA-binding activity 101

J

J-domain (L) 277
JAK family of protein tyrosine kinases 222
Jun 39
c-Jun NH_2-terminal kinase (JNK) 470, 490

K

kinemages (CC) 135
kinetic simulation and fitting programs (CC) 181
kinetics of metabolic channeling 193
KINSIM (CC) 181
kit wars (CC) 46
KSS1, MAPK homologue 236

L

L1, carbohydrate-mediated interactions 233
lactate dehydrogenase, RNA-binding activity 101
lectins, NCAM 223
leucine-rich repeats 415
leucocyte adhesion, transient 354
ligand binding, and allosteric transitions 396, 399
liver, fatty acid metabolism 313
lynx browser (CC) 259
lysozyme, folding studies 31

M

macrophage scavenger receptor, type I 5
Magic™ mini-prep kit (CC) 182
magnetic resonance imaging studies of brain function 522
major histocompatibility molecules class I, and calnexin 124
major intrinsic protein (MIP), aquaporins 421
MAPK
HOG1, KSS1/FUS3, MPK1 and pathways 470
inactivation 1
links with Raf and Ras 279
mammalian 470
role in smooth-muscle contraction 366
translocation to the nucleus 373
MAPK cascades
diversity in function and regulation 236, 470
insulin-receptor substrate 1 signalling system 292
kinases and phosphatases 483
and Raf 474
transforming growth factor β receptor 548
and two-component signalling pathways in yeast 489
MAPK kinase (MEK) 1, 470
and Raf 474
Ras–MAPK cascade 279
signal transduction in the early *Drosophila* embryo 511
MAPK kinase kinase (MEKK) 470
MAPK phosphatase family 484
MDM2 (PSM) 198
MEK, *see* MAPK kinase
MEKK, *see* MAPK kinase kinase
membrane binding, annexin V 272
membrane permeability, aquaporins 421
membrane-spanning proteins, acetylcholine receptor 383
membrane traffic
role of phosphoinositides 56
see also Golgi, Rab proteins, annexins
membrane translocation, mitochondrial molecular chaperones 87
messenger RNA degradation, eukaryotic 336
metabolic channeling, regulation of 193, 519
methylcrotonyl-CoA carboxylase (L) 359
microcystins 444
microwaving restriction digests (CC) 556
MIM44, 17, 23, mitochondrial protein import 369
mini-prep kits (CC) 182
mitochondrial inner membrane, protein import machinery 368
mitochondrial molecular chaperones 87

mitogen-activated protein kinases, *see* MAPK
MKP-1, feedback control 483
molecular chaperones
calnexin 124
DnaJ-like proteins 176
Hsp70 and Hsp60 families 20
Hsp90 205
Hsps, small 205
J-domain in viral T antigen (L) 277
mitochondrial 87
nucleoprotein-complex formation 185
YegD 311
molecular imprinting 9
molecular motors 129, *see also* myosin, actin
MOM38/ISP42, mitochondrial protein import 369
Monod–Wyman–Changeux theory 396, 399
Mosaic WWW browser (CC) 259, 554
MPK1 236, *see also* MAPK
mucins, transient intercellular adhesion 354
multicatalytic proteinase (MCP), *see* proteasomes
multidrug resistance pumps, bacterial 119
multienzyme systems, metabolic channeling 193, 519
murein metabolism (PSM) 106
muscle
contraction 362
titin and nebulin 405
c-Myc
role in apoptosis 29
and transforming growth factor β receptor 553
myofibril structure 405
myosin
interactions with titin 406
smooth-muscle contraction 362
three-dimensional structure 129
myosin light-chain kinase (MLCK)
smooth-muscle contraction 362
specificity determinants 440

N
NCAM, carbohydrate-mediated interactions 233
nebulin 405
neural-cell-adhesion molecules, carbohydrate-mediated interactions 233
neurofibrillary tangles 42
neurotrophin receptors, oligomerization 459
nicotinic acetylcholine receptor 383
allosteric transitions 396, 399
NifU protein family (PSM) 199
nodulin GMAK170 (PSM) 19
non-insulin-dependent diabetes mellitus (NIDDM), pancreatic β-cell glucose sensors 537
nuclear factor 1 (NF1), transcription and positioned nucleosomes 241
nuclear hormone receptors, interaction with calreticulin 269
nuclear localization signal, insulin-like growth factor-binding protein type 3 (PSM) 278
nuclear magnetic resonance spectroscopy (NMR), studies of brain function 522
nuclear protein tyrosine kinases 373
nucleocytoplasmic transport, role of Ran 211
nucleoprotein-complex formation, and DNA chaperones 185
nucleosome positioning and transcription 240
nucleotide excision 83
nucleotide-binding domains
in the CFTR 513
in EF-Tu 245
in F_1F_o-type ATPases 284
in RNA-binding proteins 101
nucleotide-binding folds
convergent evolution 15
structure in protein kinases 201

O
octamer factor (OCT), transcription and positioned nucleosomes 241
okadaic acid 444
oligonucleotide shape libraries 57
oligopeptide transport proteins (PSM) 404
olomoucine 446
ornithine decarboxylase (PSM) 318
β-oxidation, hepatic fatty acid metabolism 314
oxidosqualene cyclases (PSM) 157
2-oxoacid dehydrogenase multienzyme complexes (PSM) 360
oxygen
consumption in the brain 522
reactive species and apoptosis 100

P
^{33}P (CC) 227
P-loops, structure in protein kinases 201
p25, pap1-dependent, brefeldin-A-resistance protein (PSM) 107, 234, 235
$p34^{cdc2}$-activating kinase (CAK) 496
p38 protein kinase 470
$p40^{MO15}$, $p34^{cdc2}$-activating kinase (CAK) 496
p53
and DNA-damage inducible kinases 500
p53-associated protein MDM2 (PSM) 198
role in apoptosis 29
transcription repression 41
p88 see calnexin
paired helical filaments 43
pancreatic β-cells, glucose sensors 535
paxillin, and SH2 domains 457
PCR, *see* polymerase chain reaction
peroxides, and apoptosis 100
PH (pleckstrin homology) domains 349
and phospholipases 54
insulin-receptor substrate 1 289
phosphatases, *see* protein tyrosine phosphatases
phosphatidylinositol transfer protein (PITP), role in vesicular traffic 55
phosphoinositide 3-kinase (PI 3-kinase), regulation by insulin-receptor substrate 1 291
phosphoinositides, role in vesicular traffic 55
phospholipase C
PH domains 54, 351
SH2 domains 453
phosphoribosylpyrophosphate synthetase (PSM) 19
phosphoryl transfers, role in DNA strand transfer 78
phosphorylation
of eIF-2 491
of myosin 362
of RNA polymerase II by TFIIH 504
of titin 407
two-component systems 485
see also protein kinases, protein tyrosine kinases, protein serine/threonine kinases, protein phosphatases, etc.
photosynthetic reaction centres (PSM) 401
photosystem I (PSM) 401
PIC1 CDK inhibitor 143
plakoglobin 538
plasmid preparation kits (CC) 182
plasmid replication, control by antisense RNA 294
platelet activation, regulation of protein tyrosine kinases 464
platelet-derived growth factor β-receptor, oligomerization 459
poly(A) tails, and mRNA degradation 336
poly(ADP-ribose) polymerase 172
polymerase chain reaction
long and accurate methods (CC) 341, 342
primer rescue (CC) 93
PRD1 gene 7 (PSM) 106
primer extension and DNA sequencing methods 429
propionyl-CoA carboxylase (L) 359
prospero (PSM) 70
proteasomes 377
sequences in eubacteria (PSM) 533
protein degradation, role of proteasomes 378
protein disulphide isomerase 331
bacterial 169
protein folding
lysozyme 31
protein disulphide isomerase 331
protein kinase C
intracellular translocation 450
isotypes 73
role in apoptosis 27
role in smooth-muscle contraction 366
protein kinase inhibitor (PKI) 444
intrasteric regulation of protein kinases 440
protein kinases
in development 509
and DNA damage 500
glycine-rich loops 201
inhibitors 444
interaction with Hsp90 206
spatiotemporal distribution of activities 448
specificity determinants 440
of translation initiation factor eIF-2 409

see also cyclin-dependent protein kinases, MAPK, protein phosphorylation, protein serine/threonine kinases, protein tyrosine kinases, receptor tyrosine kinases, etc.
protein phosphatases
inactivation of MAPKs 1
inhibitors 444
PP1 activation by transforming growth factor β receptor 548
spatiotemporal distribution of activities 448
